Overview

Understanding the Employer Responsibilities under OSHA is the first step in developing a safety program and preventing injuries. All employers, regardless of state, that must follow OSHA guidelines are advised to develop a safety and health program based on the nature of work that is performed within the organization. This would result in an employer having an Injury Illness and Prevention Program that details the safety training required of an employer based on workplace hazards.

OSHA Training Courses

We provide 25+ training packages and have nearly 200 individual courses to satisfy requirements within your safety and health program. Our courses cover topics such as **Confined Space Entry, Forklift, General Safety, HAZWOPER**, and much more! We even offer Safety Certification Training and OSHA 10/OSHA 30 courses.

Building out your safety and health program can be quite elaborate. You've just spent all this time creating a compliant and safe program, now you have to actually execute. That's where we come in! We have nearly 200 courses that can satisfy the requirements set out in your OSHA-compliant Injury and Illness Protection Program (IIPP)!

Various OSHA Topics

Confined Space Entry

- ideal for workers and professionals who must work in or around confined spaces—including storage bins, silos, manholes, pits, pipelines, underground vaults, tanks, and process vessels.

Construction Safety

- With over 70 training courses covering topics such as Fire Safety, Welding and Cutting, and Scaffold Safety, you will surely find the courses you need to satisfy your OSHA requirements.

Forklift and Heavy Equipment

- These courses will provide your employees with the basic knowledge on how to operate heavy equipment such as forklifts.

General Safety

- We have over 50 training courses to choose from covering topics such as Ergonomics, Workplace Violence Prevention, PPE, Lockout/Tagout, and more.

HazCom

- The HazCom courses discuss the employees' "right to know" about the properties and the effects of chemicals and other hazardous substances that they are exposed to.

HAZWOPER Training

- Hazardous Waste Operations and Emergency Response (HAZWOPER) is training covered under OSHA standards 29 CFR for workers and employers who are exposed to hazardous substances and are engaged in cleaning, treatment, storage, and disposal of such materials.

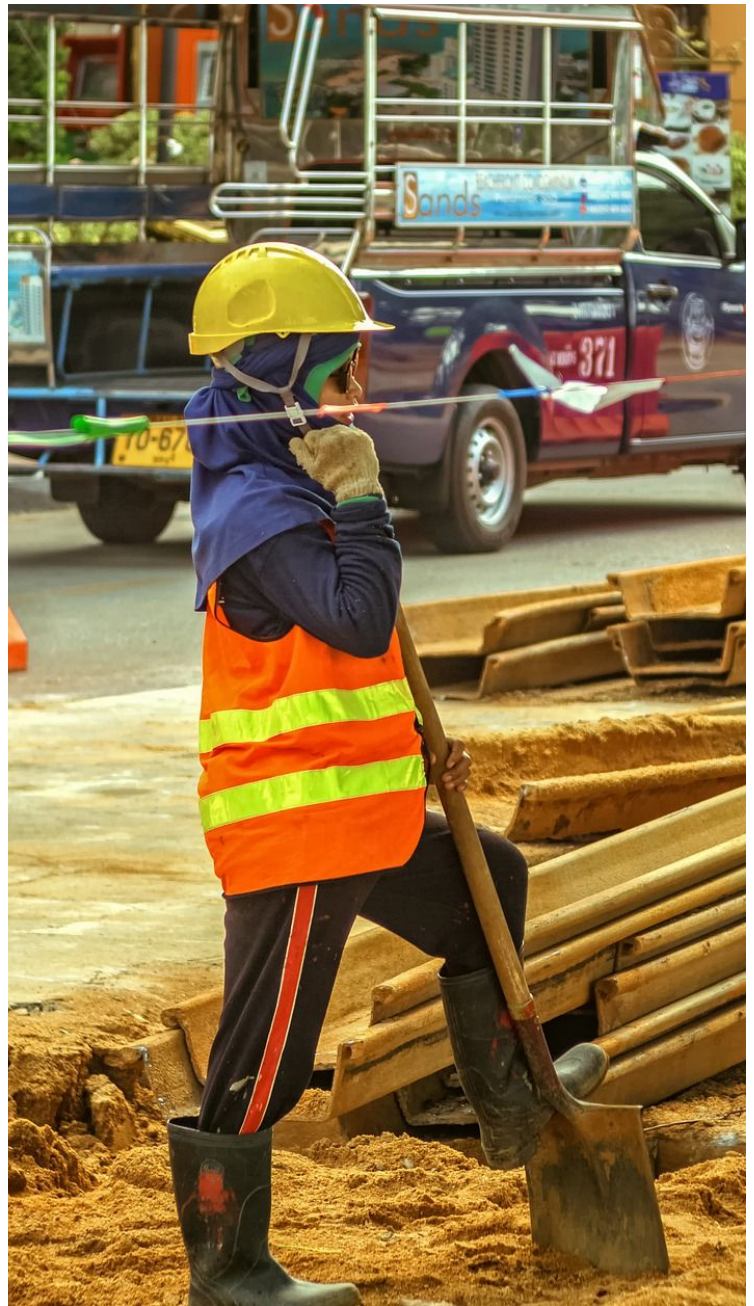

Industrial Hygiene

- This course teaches employees how to prevent harmful substances from affecting their bodies. It will discuss the methods of identifying toxic substances, the effects of these to the human body and lessons on reducing exposure to such substances.

Supervisor and Competent Person

Cal-OSHA

- This course explains the standards of Cal-OSHA for various potential hazards and covers legalities of the Federal OSHA act with regard to prevention and elimination of work-related fatalities and injuries.

OSHA 10 General Training

Countless employees are being exposed to general industry hazards on a daily basis. To help workers stay safe and compliant, we have tapped subject matter experts to develop the **10-Hour General Industry Outreach Training Program**. This program is intended to provide an **entry level** general industry worker's broad awareness on recognizing and preventing hazards on a general industry site. Trainees will be introduced to OSHA policies, procedures and standards as well as general industry safety and health principles and work practices covered in OSHA Act Part 1910. *Special emphasis* will be placed on areas most hazardous using OSHA standards as a guide. General industry workers must receive additional training, when required by OSHA standards, on specific hazards of the job.

OSHA 10 Construction Training

Industry experts have created this 10-hour outreach training program with **entry-level construction workers** in mind. It underscores how to recognize, avoid, abate, and prevent occupational hazards in the construction industry. Aside from an orientation to construction-related safety and health issues at work, these training modules tackle OSHA regulations, employer responsibilities, and even workers rights.

OSHA 30 General Training

OSHA 30 Hour General Industry Outreach Training course is a comprehensive safety program designed for anyone involved in *general industry*. Specifically devised for **safety directors, foremen, and field supervisors**; the program provides complete information on OSHA compliance issues. OSHA recommends Outreach Training Programs as an orientation to occupational safety and health for workers covered by OSHA 29 CFR 1910.

OSHA 30 Construction Training

The OSHA 30 Hour Construction Industry Outreach Training course is a comprehensive safety program designed for anyone involved in the *construction industry*. Specifically devised for **safety directors, foremen, and field supervisors**; the program provides complete information on OSHA compliance issues. OSHA recommends Outreach Training Programs as an orientation to occupational safety and health for workers covered by OSHA 29 CFR 1926.

Getting Started & Pricing

What We Need

All we need from you is the employee's first name, last name, and email address.
